

# HKGBC Distinguished Lecture - Futureproofing Our Cities for a Shared Low-Carbon Future

**26 November 2019 (Tuesday)**

**6:30 pm - 8:00 pm**

**Auditorium, G/F, Jockey Club Environmental Building, 77 Tat Chee Avenue, Kowloon Tong**

As cities struggle with the pressure to reduce greenhouse gas emissions, better support green jobs, and hyper-competitive real estate markets, they must find new and creative solutions that address short- and long-term issues. This includes creating a low- or zero-carbon future, which requires a step-by-step process to retrofit our existing communities, and ensure all future builds are net zero carbon operations by 2050. From policy to infrastructure to new and old buildings, this session will look at how we can create cities that improve lives through deep carbon reduction, creating co-benefits for people and the planet.

**Speaker:** Lisa Bate, Chair of the Board, World Green Building Council

Lisa Bate is regarded as one of Canada's global ambassadors for sustainable design. A former Director and Board Chair of the Canada Green Building Council, Lisa is the Chair of the World Green Building Council and was a representative to the United Nations' Environmental Protection—Sustainable Buildings and Climate Initiative. In 2018, Lisa was named the winner of Canada's Clean16 for the Building sector at the Clean50 awards celebration. In her role as Global Sustainability Lead at B+H Architects, she oversaw the design team responsible for the new Net Zero Carbon Design Certified Joyce Centre for Partnership and Innovation at Mohawk College in Hamilton, Ontario, an advanced net-zero energy, waste and water building and a Canadian pilot project for the CaGBC Zero Carbon Buildings and the WorldGBC Advancing Net Zero Initiatives.
