Biography

Julie is a seasoned sustainability practitioner with extensive experience in driving sustainable development and implementation. At Hysan Development Limited, she leads the company's sustainability initiatives through the Community Business Model, which aims to improve community wellness and livability. In addition to overseeing the company's strategic approach to climate change and decarbonization, Julie is also responsible for The Community Lab, a partnership between HKSTP and Hysan that nurtures start-ups through real-life testing of innovative technologies.

Prior to joining Hysan, Julie has held sustainability roles at other Hong Kong listed companies, including New World Development and NWS Holdings, where she played a leading part in developing and implementing sustainable strategies. She has also gained relevant experience at Swire Properties, KPMG and Mott MacDonald, with involvement ranging from in-house implementation to consultancy work.

Julie holds an MBA from the University of Iowa, a Master's degree in Energy and Environmental Studies from Boston University and a Bachelor's degree in Civil Engineering from the University of Auckland, New Zealand. She is qualified as a BEAM Professional and LEED Accredited Professional, and is also an IRCA Environmental Lead Auditor.
