

HKGBC Webinar Series: Hygienic Toilets – From Automatic to No-touch and Healthy Design

11 May 2020 (Monday)

5:00 pm - 6:00 pm

The Webinar will be conducted via Zoom

Following the outbreak of the COVID-19 pandemic, coronavirus was confirmed to be present in human excrement. Apart from the need for good design and maintenance in the drainage system for toilets/bathrooms, an appropriate selection of sanitary wares is equally important in order to achieve the maximum level of hygiene. This has an important role to play in reducing the chance of infection of the virus in our living/working environments.

This webinar will look at the latest design and technologies in sanitary wares. In particular, the speaker will examine how traditional automatic washroom is migrating to no-touch and healthy design with the use of new technologies.

Speaker

Mr Kenny M B WONG

MHKIS, RPS, FCIPHE, Master Plumber, LP1,
Green Building Faculty

Programme

5:00 pm – 5:50 pm **Webinar on Hygienic Toilets – From Automatic to No-touch and Healthy Design**
